Policy MIN1 Mineral Development – Extraction and Processing of Hard Rock and Aggregates

7.4.16 - Whilst there is not a general presumption against mineral development in the AONB, ~~areas designated for their landscape quality, notably the AONB,~~ Council will exercise a cautious approach within this area. All proposals will therefore be carefully examined and the LDP Landscape Character Assessment will be used to inform decisions. The historic landscape and associated features will also be given due consideration in assessing proposals.
