like to include river flow in	t we are yet to finalise our report and are looking at a time scale of mid next week. I would information if this can be downloaded and incorporated. I our Total Suspended Solids data back from the lab. for stream flow samples taken on the day ell below our consent limit of 50 mg/L – and including a sample taken from the ditch bounding andary.
Will be in touch Regards

Subject: Telephone Call Friday 23 1 15 regarding Site Drainage Discharge Incident at DGL Site Gortin

From your telephone call earlier today, could you please provide me with the detail regarding the site drainage discharge incident which took place today.

I would be grateful if myself and could visit the site on Monday at 0930.

Best Regards

Water Management Unit Lisburn
